An Indication of Value

NEW POWR-GARD® Fuseblocks

Littlefuse understands your challenge to constantly improve your products. That's why we developed a brand new line of next generation fuse blocks.

Introducing the LF Series Fuse Blocks. Smaller. More efficient. More valuable to your customers.

## Designed with OEMs in mind

Your customers want to increase efficiency, troubleshoot faster, reduce downtime and improve their bottom line. You can help them do just that by using the Littlefuse indicating fuse blocks to instantly let them know which circuit is open. This extra benefit can be provided with virtually no extra investment on your part.

Do the smart thing for your customers and your business, opt for the value of indication that only Littlefuse provides. Outperform your competitors and be the first to offer a valuable benefit to your customers.

## Saving Space with the Next Generation of Fuse Blocks
